I'm a Frontend Developer with 4 years of hands-on experience building responsive, user-friendly web applications and digital experiences. I specialize in Angular, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, SCSS, and REST API integration, with a strong focus on clean UI, reusable components, accessibility, and performance.

I enjoy turning Figma designs and product ideas into pixel-accurate, functional interfaces that work consistently across devices and browsers. My experience includes working on travel and booking platforms, developing responsive web pages, integrating APIs, improving existing interfaces, and solving real-world frontend challenges.

For me, good frontend development is more than making a website look good. I focus on creating experiences that are easy to use, maintainable, accessible, and aligned with business requirements—while keeping the underlying code clean and scalable. I'm continuously expanding my skills in Angular, JavaScript, React, and modern frontend development, while exploring better ways to combine UI/UX thinking with strong engineering practices.

Core Skills: Angular | JavaScript | TypeScript | HTML5 | CSS3 | SCSS | Bootstrap | REST APIs | Responsive Web Design | UI/UX | Figma | Git

## Experience

**Web Designer** • GenX eSolutions • Noida, India

Feb '25 – Present

- Delivered frontend solutions across 7+ client engagements, contributing to scalable travel booking platforms while maintaining consistent on-time releases
- Refactored modular booking engines into micro-architectures leveraging Standalone Components, Standalone APIs, and Feature Modules to separate core search workflows. dynamic
- Integrated real-time travel GDS systems using Angular HttpClient and complex RxJS Operators to handle error fallback streams parallel live fare state transformations. and
- Implemented Server-Side Rendering (SSR) and frontend optimization strategies that reduced page load times by 35% while improving Core Web Vitals.
- Developed token-refresh and centralized error-handling pipelines across checkout screens via global HTTP Interceptors.
- Managed requirements tracked via Jira, delivering optimized frontend features across managed Agile cycles on schedule.

**Junior frontend developer** • Sago • India

Oct '21 – Apr '24

- Built and maintained enterprise-grade Angular SPAs structured into scalable Feature Modules, implementing reusable UI components and dynamic routing architectures.
- Utilized reactive programming principles via distinct RxJS Operators to throttle rapid form updates within interactive Reactive Forms modules.
- Enforced fine-grained route security and lifecycle control by attaching async validation criteria through functional route Guards.
- Diagnosed and resolved 50+ UI defects across major browsers using Chrome DevTools, improving target application production stability by 20%.
- Collaborated closely in Agile/Scrum sprints with backend developers and UX designers, integrating production code updates through managed Azure DevOps workflows.

**Management Trainee** • Sago • Gurgaon, India (Remote)

Jul '21 – Sep '21

- Developed, revamped, and optimized responsive websites and landing pages for freelance clients. • Improved performance, accessibility, and user experience through frontend optimization. Apr 2024 – Jan 2025 • Enhanced expertise in Angular 17, Angular Signals, NgRx, SSR, and modern frontend architecture through self-directed learning and deep hands-on projects.

## Skills

**Top Skills:** HTML, CSS, Bootstrap, Javascript, TypeScript, Angular, Angular Material, Npm, Node.js, Express.js

## Education

**Amity University**, Noida, India | Bachelor Computer Application , Computer Science  
Computer Science

Mar '24 – '27

- Alongside my academic studies, I have developed practical skills in HTML, CSS, JavaScript, TypeScript, Angular, UI/UX, and responsive web development through hands-on projects and continuous learning.... more

**ARKA JAIN UNIVERSITY, Jamshedpur, Jharkhand**, Jamshedpur, India | High School Diploma, Computer Science  
Computer Science

'18 – '21

GPA: 8.4

- Built a foundation in Computer Science, programming, databases, software development, and web technologies. Developed practical knowledge of HTML, CSS, JavaScript, responsive design, and UI development through academic projects. Strengthened problem-solving, debugging, and software development skills through hands-on coursework and projects.
